

If you needed pest control here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we're here to help provide pest control solutions quickly and effectively. Birds such as gulls, pigeons and even parakeets, when handed a ready food source and sheltered nesting site, can grow rapidly and what was initially a few birds can soon become a thriving colony. Pigeons alone carry more than 110 pathogens which can be passed onto humans. Their droppings can also cause damage to buildings, block gutters, and create hazardous walking surfaces.

Diseases can be transmitted from bird droppings and the birds themselves, when dry, pigeon droppings become airborne in small particles, which can lead to respiratory issues. Left untreated, these issues can escalate and pose serious health risks, especially in commercial or densely populated areas. We can recommend and install bespoke bird deterrent installations to deter pest birds. Common methods include bird proofing (nets, spikes, and wire systems), falconry, and humane trapping. Our team ensures that all deterrent systems are installed safely and efficiently with regular maintenance and monitoring of these systems. Simply contact us today to request a survey and quotation.

We'll be there when you need us.
