

If you needed varied access window cleaning here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we provide commercial window and façade cleaning for housing associations, local authorities, block management teams and commercial agents. Offices, community buildings, concierge areas and high-rise residential blocks, we keep the external presentation consistent and professional across your portfolio.

Our planned maintenance schedules and health and safety compliant access methods ensure reliable service delivery with minimal disruption to residents, staff and visitors.

This is about more than appearance. Clean glazing improves first impressions, supports tenant satisfaction and keeps communal spaces feeling managed. We match the method to the building, using water-fed pole systems where suitable and high-access solutions such as MEWPs or rope access where required, with works planned to minimise disruption and reduce risk. All operatives are fully trained, insured and RAMS-compliant, with clear communication before, during and after every visit. We also provide detailed service reports to support asset management records and demonstrate compliance where required.

Simply **contact us** today to request a quotation.

We'll be there when you need us.

For our full range of services and further details simply call or visit our website www.fortispropertyservices.co.uk

Window Cleaning Services

Technical overview

Planned and reactive commercial glazing and façade cleaning, including high access.

Methods available

- Water-fed pole cleaning (ground-based)
- MEWP access (cherry picker)
- Rope access (where appropriate)
- Traditional internal cleans (communal glazing)

Typical scope

- External windows and frames
- Entrance glazing and internal communal glass
- Balustrades and canopies (by agreement)
- Spot cleans following works

What you get

- Consistent presentation across portfolio
- Reduced complaints and improved building perception
- Safer planned access vs reactive scrambling

Process

1. Survey and access method selection
2. RAMS and programme schedule
3. Clean delivery and quality check
4. Photo evidence on request
5. Planned frequency option

Health & safety controls

- Work at height planning and exclusion zones
- Pedestrian management where public interface exists
- Equipment inspection controls
