

If you needed quality drone surveys conducted here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we carry out drone surveys to give you fast, high-quality visibility of roofs, façades and hard-to-access areas without immediately resorting to scaffolding or intrusive access. For housing, commercial and public-sector clients, drones provide clear evidence for repairs planning, tendering, insurance documentation and asset condition reporting. Captured imagery and footage are compiled into structured reports, enabling informed decision-making while reducing cost, risk and operational disruption.

Drone surveys reduce risk and speed up decision-making. You get dated imagery, clear defect visibility and a safer starting point for scoping works. We manage the process end-to-end, including planning, risk assessment, site coordination and reporting outputs that are actually usable.

Simply **contact us** today to request a quotation.
