

If you needed remote monitoring hygrometers here tomorrow

you'd call: 0203 859 9588

At Fortis Property Services, we supply, install and manage remote hygrometers that give you clear, ongoing visibility of humidity conditions inside properties and communal areas. It's one of the simplest ways to get ahead of damp and mould risk, reduce repeat visits, and move from opinion-led conversations to evidence-led decisions. Continuous data tracking allows early intervention before minor moisture issues escalate into costly remediation.

You can rent the devices or purchase outright. The supporting software platform and secure data storage is provided on a monthly subscription for as long as the devices remain installed. We install each unit, set it up, and manage it properly. Your authorised users get access to live and historical readings, so conditions can be assessed routinely without guesswork. Clear visibility, accountable monitoring and reliable data when you need it. Simply **contact us** today to request a quotation.

For our full range of services and further details simply call or visit our website www.fortispropertyservices.co.uk

We'll be there when you need us.

Hygrometers

Remote Humidity Monitoring for Damp Risk Control

These are built for real-world environments. Hygrometers have long-life batteries, connect via IoT, and include a tamper alert to flag vandalism, removal or relocation. That matters in communal areas, voids, and higher-risk settings where equipment can be interfered with.

This service is used where clients need control, not just a one-off reading:

- Damp and mould risk monitoring across occupied homes
- Void properties held pending works or handover
- New-build units awaiting occupancy
- Communal spaces where ventilation and humidity fluctuate
- Repeat complaint addresses where evidence is essential

What you get is practical:

- Early warning before conditions escalate
- Clear data to support next steps and prioritisation
- Reduced repeat call-outs and “back and forth” visits
- Stronger documentation for case management and audit
- A calmer conversation with residents, backed by facts
