

If you needed temporary toilets and washrooms here tomorrow

you'd call: 0203 859 9588

Poor welfare provision isn't a small issue. It delays mobilisation, damages site standards, and creates avoidable compliance and reputational risk from day one. At Fortis Property Services, we supply, install and service temporary toilets and washrooms for construction sites, vacant site set ups, regeneration projects and short-term works programmes. We provide the right units, in the right locations, with a clear servicing plan, so your site stays operational, compliant and professional throughout the works.

This service is about control. Proper welfare reduces friction, supports productivity and helps you meet duty of care expectations. Whether you need a rapid set up for a new site, additional capacity for peak phases, or longer-term managed provision, Fortis PSG delivers a structured solution rather than a drop-and-forget hire.

Temporary Toilets & Washrooms

Technical overview

A managed welfare provision service supplying temporary toilets and washrooms with planned servicing, hygiene control and accountable site support for construction, regeneration and vacant site set ups.

What we install

- Portable toilet units (single and multi-unit requirements)
- Washroom units (site dependent)
- Handwash stations and hygiene points (as specified)
- Internal consumables provision (as agreed)
- Optional welfare cabins and combined welfare blocks
- Optional signage and positioning controls for public-facing sites

What you get

- Fast mobilisation of compliant welfare provision
- Planned servicing schedule with clear accountability
- Cleaner sites and improved workforce standards
- Reduced operational disruption from welfare failures
- A professional, managed approach that protects reputation

Process

- Site survey and placement planning
- Delivery and safe positioning
- Commissioning and readiness check
- Scheduled servicing, cleaning and replenishment
- Collection or replacement as programme changes

Typical use cases

- New site mobilisation prior to works commencing
- Long-running construction and phased regeneration projects
- Temporary welfare during peak programme periods
- Vacant or unoccupied site set up where welfare is needed for visiting teams
- Emergency replacement where existing welfare fails

Health & safety controls

- Safe placement planning: access routes, stability, clearances
- Servicing route control to minimise public interface risk
- Hygiene and contamination controls for operatives
- PPE and safe handling procedures
- Exclusion and barrier controls where units are positioned in live public areas

Reporting

- Servicing schedule confirmation
- Service visit logs (where required)
- Incident and damage reporting (if vandalism occurs)
- Unit inventory list for site records
